CP SISTEMI

PRODUCTIVE
PROCESS
SOFTWARE

Main features:

- COM and TCP/IP channel.
  Each driver can be used on COM port or TCP/IP socket

- Multi-driver.
  Executes multiple drivers simultaneously

- Multi-threading.
  One dedicated thread for each communication channel.

- Up to 1000 tags using eWon Flexy

- Communication status info available (ON, OFF, number of packets)

- Driver can be controlled (stopped , started) using system tags

- Compatible with eVCom and specific device software tools:
  stopping the driver COM or TCP connection is released.

- Integration with eWON's Real-Time Log for diagnostic

- Demo license available
